PROJECTS

- **E-Vyavasaya**

Technology- HTML, CSS, JavaScript, Bootstrap, JDBC, Servlet, JSP, Oracle.

E-Vyavasaya is designed to connect people with skilled workers and service providers in various trades, such as plumbing, electricians, masonry, driving, interior design, painter, and directly contact with owner of room or vehicle rental services with customers. A user-friendly interface for both service providers and those in need of services.

The system is built with a responsive UI using Bootstrap, with secure data management and retrieval powered by Oracle SQL.

- **Portfolio (Dynamic Portfolio Builder)**

Technology- HTML, CSS, JavaScript, Bootstrap, JDBC, Servlet, JSP, Oracle.

Developed a portfolio platform that allows users to create their own personalized portfolios with a consistent, professional UI. By simply filling out a form, users can generate a fully functional portfolio with their details dynamically populated into the same design, without needing to write any code. The system ensures user-friendly interactions, responsive layouts

- **Myntra Clone**

A Simple UI design of e-commerce platform to create a user-friendly interface. Implemented features are shopping cart management, product listings.

- **Music Player**

It aimed to create a simple yet functional music player interface. Including many features such as play/pause controls, volume adjustment, track progress display and songs lists and dynamically search.
